

The screenshot displays the QGIS desktop environment. The main map window shows a satellite view of a rural area with a water network overlay. The network consists of red lines representing pipes and blue circles representing valves. The left sidebar (Layers) shows a tree view of the project layers, with 'wa_pipe' selected under the 'PROGETTO' layer. The bottom panel shows a table of selected elements for the 'wa_pipe' layer. The table has columns for id, obj_id, _from_node, _to_node, cod_numb, cod_sif, count, date_inst, depth, diam_nom, diam_nom_2, flag, and grnd_elev. The right sidebar shows the 'Statistics' panel for the 'wa_pipe' layer, displaying various statistical measures like length, count, sum, mean, median, etc.

id	obj_id	_from_node	_to_node	cod_numb	cod_sif	count	date_inst	depth	diam_nom	diam_nom_2	flag	grnd_elev
